Return Method:  UPS Ground  Customer Pick-Up  ERS Delivery

*\*Please note: A \$7.50 shipping & handling fee will apply to all returns via UPS.*

Date: \_\_\_\_\_ Name of ERS Personnel receiving unit: \_\_\_\_\_

# Shipping Instructions

Shipping a unit in for repair:

1. **Use a corrugated box.** Use a box big enough to allow for an adequate amount of packing material to protect all sides of the unit. If using a box that has already been used before, strip all previous shipping labels from box.
2. **Provide Internal Protection.** Wrap each unit separately. If you are placing more than one unit in one box, each item should be wrapped well, and then additional packing material should go between units to further protect them from damage during shipping. A rule of thumb is that there should be 2-4 inches of packing material on all 6 sides of the box between the unit(s) and sides of the box. Many things can be used for packing material, such as; foam peanuts, bubble wrap, newspaper, etc.
3. **Include Repair Form.** Before sealing your box, make sure you put a copy of the repair form in packing slip sleeve, or in the box, preferably rubber banded to the unit to be repaired (keep a copy of the repair form for your records as well).
4. **Close Box Securely.** Make sure the box is sealed tight with water-activated paper tape or plastic packing tape.
5. **Label Box.** The link below is a shipping label. Simply print it out, fill in your company information and attach it to the box.

This shipping label is included for your convenience.
